

# MOBILE BODYSHOP REPAIR SOLUTION FOR ALLIANCE HEALTHCARE

## ALLIANCE HEALTHCARE

Alliance Healthcare are a leading wholesaler of healthcare products in the UK serving over 17,000 pharmacies, doctors, hospitals and health centres from their service centres across the UK. Alliance Healthcare offers a broad range of healthcare solutions from the beginning to the end of the business cycle.

## MOBILE BODYWORK REPAIR FOR A FLEET VEHICLE

### THE CHALLENGE

Alliance Healthcare's Hinckley site faced a significant challenge when one of its fleet vehicles suffered substantial damage to its bodywork. The damage was caused by a collision, impacting the vehicle's functionality and appearance and thereby hindering its operational efficiency. A swift and effective repair solution was imperative to ensure minimal disruption to their logistics operations.

### THE EXECUTION

Given the extensive nature of the damage, Budget Mobile Bodyshop arranged for the VW Crafter Luton to be transported to their bespoke commercial bodyshop facility in Mansfield. Once at the facility, our team of skilled technicians meticulously dismantled the damaged components and proceeded to replace them with new parts. The repair process was executed with precision and efficiency, adhering to the agreed-upon time-line of 5 working days.
