

# EFFICIENT COMMERCIAL PANEL PAINTING FOR ENVA

## CLIENT ISSUE

ENVA, a leader in waste management, required a panel replacement on one of their vehicles but needed the work to be completed without disrupting their vehicle's availability. We were tasked with collecting the new panel, painting it, and refitting it, all scheduled while the vehicle was not needed to be use during the process.

## OUR SOLUTION

We tailored our approach to ENVA's operational needs, ensuring minimal downtime and that their vehicle was ready for use as soon as possible. This was a prime example of our ability to work around our clients' schedules and deliver high-quality service without affecting their operations.

## THE REPAIR PROCESS

- 1. Panel Removal:** We arrived at the site on Friday morning and carefully stripped the damaged panel from the vehicle.
- 2. Panel Preparation and Painting:** By late morning, the panel was prepared for painting. We completed the painting in the afternoon, ensuring a high-quality finish that matched the vehicle's original appearance..
- 3. Re-installation and Final Touches:** On Saturday morning, the painted panel was refitted and the camera was mounted, ensuring the vehicle was fully restored and ready for use.

## THE OUTCOME

This project was successfully completed over the course of two days, with minimal impact on ENVA's vehicle availability. The new panel was carefully painted and refitted, ensuring the vehicle was back on the road in no time. The smooth execution of this project demonstrated our commitment to working efficiently around our clients' schedules.

## CONCLUSION

This case highlights Budget Mobile Bodyshop's expertise in providing commercial panel painting services. By carefully planning and executing the repairs, we ensured that ENVA's vehicle was out of service for as little time as possible. Our fast, professional service helped ENVA maintain their operations without unnecessary delays.
